Subject: EPA statement

Hi, Adam,

I work with Rich and he asked me make sure you receive EPA's statement. Attributable to EPA or the agency. Thanks!

EPA has released new monitoring data as part of the agency's ongoing analysis of ground water quality in the Pavillion, Wyoming area. These data were collected in collaboration with the United States Geological Survey (USGS), which conducted its own sampling at one of the wells. USGS data were released earlier. EPA's new data and the USGS data are generally consistent with the monitoring data included in EPA's December 2011 Draft Report on Pavillion Area Ground Water Investigation. The data, along with EPA's draft report and USGS data, will be submitted to an independent expert peer review panel. EPA is accepting public comment on its data through January 15, 2013 to give stakeholders sufficient time to consider all data related to the Pavillion, Wyoming groundwater investigation.
